Chapter Resources .....	7-18

### Introduction

A major goal of this plan is to promote and enhance the City’s neighborhoods through improving the livability and housing stock, which increases property values, attracts people to live in the City, and improves their quality of life. To assist in these endeavors, strategies might include associations with conservation, stabilization, revitalization, new zoning requirements or districts, the use of incentives, or subdivision regulation mechanisms.

### Background

#### Neighborhoods

People are invested in their neighborhoods and advocate strongly for their protection. Concerns frequently cited about neighborhoods include the walkability and bikability, especially to schools; the appearance of neighborhoods; the impact of blight and blighting conditions; and the conversion of owner-occupied single-family detached and duplex homes into rentals that are occupied by many unrelated tenants. The conversion of homes into rental units or student apartments has acted as a destabilizing force and the livability of neighborhoods for families. Livability in some areas has been adversely affected due to their location to incompatible industrial or commercial uses along with the increase in traffic due to new student housing or commercial developments.

As housing needs and regulations change over the next twenty years, so must local residential development standards. The City’s Zoning and Subdivision Ordinances should be reviewed and amendments considered to meet new housing trends and demands while protecting the integrity of the City’s neighborhoods. This plan recommends that the City actively involve and encourage public participation in activities in efforts to conserve, stabilize, and revitalize their neighborhoods. This plan also

recommends that other City plans relating to transportation, parks and recreation, fair housing, and plans to end homelessness also consider their impacts – both positive and negative – to neighborhoods.

### Housing

The City has identified that neighborhoods that are inclusive and incorporate a diverse mix of housing stock allows for the efficient use of available land and best serves residents. Included within this plan’s recommendations is to review and amend the Zoning Ordinance to increase opportunities for single-family detached residential development affordable to households in a range of incomes.

The characteristics of Harrisonburg’s housing stock, such as the mix of housing types, tenure, vacancy rates, age, and condition, provide insight into the housing opportunities available within the City, as well as the City’s general economic vitality. The information included in this chapter has been gathered from the U.S. Census Bureau, the Harrisonburg Redevelopment and Housing Authority (HRHA), and from City building permit data.

### Housing Supply

The City continues to see an overall increase in the housing stock with a total number of units available in 1990 of 10,900 and in 2016 of 18,039. Single-family detached dwellings grew about 48 percent between 1990 to 2016, while during the same time the number of duplex and townhouse units has grown by about 54 percent, and multiple-family units has grown by about 61 percent. This trend is anticipated to continue due to the high rental market, duplexes and townhomes typically being more affordable to construct and purchase than single-family detached homes, and the impacts placed on the housing stock due to the increased demand for student rentals.

**Table 7-1. Trends in Housing Mix, 1990-2016, Harrisonburg**

Unit Type	1990		2000		2010		2016	
	Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
<b>Single-Family Detached</b>	4,599	42.2%	5,203	38.0%	5,984	36.3%	6,799	37.7%
<b>Duplex and Townhouse</b>	1,700	15.6%	2,382	17.4%	2,938	17.8%	4,311	23.9%

\* Includes “Other living quarters,” such as an RV.

Figure 7-1 and Figure 7-2 illustrate building permit data for the last 17 years. Building permits for new housing peaked in 2007 just before the Great Recession. Single-family detached construction has decreased during this time, while townhouses increased from 2006 to 2007 and multi-family units had a boom in 2007 and 2008, and spiked again in 2012 and 2014. Prior to the passage of Zoning Ordinance amendments adopted in 2007, which became effective in 2010, multiple-family units (apartments) were allowed by-right in the R-3, Multiple Dwelling Residential District. After the 2010 effective date, if a multiple-family development was not already under construction or did not have an approved engineered comprehensive site plan, then a special use permit requiring public hearings and approval from City Council was required to develop within the R-3, Medium Density Residential District. Along with the State Council of Higher Education for Virginia’s release in 2006 of projected increasing JMU enrollment in future years, discussed later in this chapter, the City experienced a boom of apartment construction and submittal of site plans prior to the effective date of the new regulations.

### Occupancy and Tenure

Table 7-2 provides data on the occupancy rates and tenure (units owned or rented) of the City's housing stock. Of the 13,689 total housing units reported by the US Census within Harrisonburg as of 2010, only about four percent were vacant. There is a trend toward a greater percentage of housing in rental versus owner-occupied units within the City, with rental units increasing from 54.7 percent of all housing in 1990 to 61 percent in 2000 to 62.6 percent in 2016.

There are two vacancy rates shown in Table 7-2. The homeowner vacancy rate is the proportion of vacant units for sale to the total homeowner inventory. It is determined by dividing the number of vacant for-sale units by the sum of the City's owner-occupied units and vacant for-sale units. The rental vacancy rate is the proportion of vacant rental units to the total rental housing inventory. It is found by dividing the number of vacant units for rent by the sum of the City's renter-occupied units and the number of vacant units for rent.

1

Table 7-2. Housing Occupancy and Tenure, Harrisonburg 2000-2016

	2000	2010	2016	Percent Change 2000-2016	Virginia 2015
<b>Occupancy Status</b>					
Total Housing Units	13,689	16,502	18,039		3,445,357
Occupied	13,133 95.9%	14,965 90.7%	16,626 92.2%	-3.7%	3,090,178 89.7%

3 *Downtown Housing*

4 Over the last 15 years, downtown Harrisonburg has experienced a housing boom. Like many downtowns  
5 nationally, young professionals and empty nesters are returning to urban living. In Harrisonburg, college  
6 students add to this mix, creating a strong downtown housing market. There is a waitlist for most  
7 downtown apartments. Market rate rent is \$.83-\$1 per square foot.

8 In 2003, there were 150 housing units downtown. Today, there are approximately 600 units downtown.  
9 Downtown housing is almost exclusively rental. However, adjacent to downtown is the Old Town  
10 neighborhood. This historic neighborhood is comprised of single family homes, some of which have been  
11 converted to apartments. The neighborhood is still predominantly owner-occupied housing.

12 Recent residential projects downtown include the City Exchange (2006) – market rate residential and one  
13 restaurant space; Sancar Flats (2007) – all market rate residential; Urban Exchange (2009) – 194 apartment  
14 units and 12,000 square feet of retail; the Ice House (2015) – a combination of a historic rehabilitation  
15 and new development of residential, retail and office space; Wine Bros Building (2016) – four luxury lofts,  
16 duckpin arcade and restaurant space, and a 7000-sq-ft retail space with 11 different retail businesses;  
17 Keezell Building (2017) – 22 market rate apartments and three retail/restaurant spaces.

18 *Student Housing*

19 James Madison University (JMU) and Eastern Mennonite University (EMU) student housing demands must  
20 be considered in any Harrisonburg housing study. According to the report “Market Analysis, Citywide  
21 Demographic and Housing Analysis, Harrisonburg, Virginia” that was prepared for the Harrisonburg  
22 Redevelopment and Housing Authority in 2015 (2015 HRHA Market Analysis), there are approximately  
23 5,000 student-headed households in the City, which also make up nearly 50-percent of all renters.  
24 Student-headed households equal about 30 percent of all City households.

25 JMU enrollment data shows a net growth of 3,918 students (a 22 percent increase) for the 11-year period  
26 from 2007 (17,918 students) to 2017 (21,836 students). Since 2010, JMU’s average annual enrollment  
27 increase was 343 students with a 2014 net enrollment of 674 students being the largest annual increase  
28 since 2005.<sup>1</sup> As of the 2016-2017 academic year, JMU had 6,444 beds within on-campus residence halls,  
29 which is about 30 percent of the on-campus full-time undergraduates. This left approximately 14,900 (70  
30 percent) students to find off-campus housing. In Fall 2017, EMU’s enrollment was 1,530 students. EMU  
31 has the capacity to house 677 students in on-campus residence halls, which is about 44 percent of EMU’s  
32 enrolled students. This left about 853 students (56 percent) to find off-campus housing.

33 The increase in student rentals since 2006 was largely in response to the State Council of Higher Education  
34 for Virginia’s release of a projected enrollment increase at JMU of 3,800 “on campus” students between

---

<sup>1</sup> Source: State Council of Higher Education in Virginia (SHEV), E02: Fall Headcount Enrollment (1992 thru Current Year), [http://research.schev.edu/enrollment/E2\\_Report.asp](http://research.schev.edu/enrollment/E2_Report.asp)

35 the fall of 2006 and the fall of 2013. With the number of student housing units recently constructed and  
 36 under construction, there should be no problem housing students that desire off-campus housing. The  
 37 2015 HRHA Market Analysis stated that between 2011 and 2015, “[t]here has been a considerable amount  
 38 of new, privately-owned student apartment unit development which is larger than enrollment growth.”  
 39 Additionally, mature, privately-owned apartment properties (those primarily built during the early 1990s  
 40 and prior) that have marketed to students had seen an increase in vacancy as students prefer to move  
 41 into newly constructed complexes. In response, there has been significant upgrading to mature student  
 42 housing properties. Some of the smaller and mature student-oriented properties are also seeing dwelling  
 43 units being occupied by non-student renters.

44 *Senior Population*

45 In 2016, the ACS estimated that the City had 4,234 residents within the 65 years and over age category,  
 46 or 8.1 percent of the total population. While the number of older adults increased in each of the past two  
 47 decades, the percentage of total population within the 65 years and over age category decreased due to  
 48 the sizeable increase in more people in other age categories. The 2016 national average for people over  
 49 65 years of age is 14.5 percent of the total population. The 2015 HRHA Market Analysis reports that in  
 50 2010, over one-third of the persons in the 65 years and over age category in the City live alone.

51 **Table 7-3. Senior Population Trends, 1990-2015**

	<b>1990</b>	<b>2000</b>	<b>2010</b>	<b>2015</b>
<b>Total Population</b>	30,710	40,470	48,910	53,540
<b>Group Quarters Population</b>	6,000	7,190	7,580	7,620
<b>Household Population</b>	24,710	33,280	41,330	45,920
<b>Senior Population 65+</b>	2,700	3,750	4,030	4,340
<b>Percent Seniors</b>	8.8%	9.3%	8.2%	8.1%

<b>Percent in Group Quarters</b>	8.2%	8.1%	7.8%	8.1%

52 Source: 2015 HRHA Market Analysis (1990, 2000, and 2010 U.S. Department of Commerce, U.S. Census, and S. Patz  
 53 and Associates, Inc.)

54 The 2015 HRHA Market Analysis reports that in the City, the senior population generally has moderate to  
 55 high incomes. In 2015, about 57.5 percent of the City’s senior-headed households have income of \$35,001  
 56 and above, with \$35,000 being the income generally required for assisted living. Just over 24 percent of  
 57 the senior-headed households have incomes under \$20,000.

58  
 59

60 *Housing Value and Housing Costs*

61 Housing costs and housing values affect who can afford to live in a community; those same variables can  
62 also impact the economic health of the community. Housing costs and values also reflect the relative  
63 supply of housing and can be an indication of the desirability of the community as a place to live.

64 As can be seen from Table 7-4, the median value of an owner-occupied house in Harrisonburg is the fourth  
65 highest of all area jurisdictions listed. The value of the City's housing, however, has not grown as rapidly  
66 as the value of housing in other area jurisdictions since 2000.

67 **Table 7-4. Median Value of Owner-Occupied Housing, Harrisonburg and Area Jurisdictions, 2000-2016**

Locality	2000	2010	2016	Percent Change 2000-2010	Percent Change 2010-2016
Harrisonburg	\$122,700	\$213,400	\$197,400	73.9%	-7.4%
Charlottesville	\$117,800	\$279,700	\$280,100	137.4%	0.1%
Staunton	\$87,500	\$164,400	\$163,000	87.9%	-0.9%
Waynesboro	\$ 89,300	\$169,700	\$158,800	90.0%	-6.4%
Augusta County	\$110,900	\$187,800	\$199,700	69.3%	6.3%
Rockingham County	\$107,700	\$192,900	\$200,900	79.1%	4.1%
Virginia	\$125,400	\$255,100	\$248,400	103.4%	-2.6%

68 Source: U.S. Census Bureau, American Community Survey, 2010 and 2016 5-year Estimates

69 This relative low rate of increase in value of owner-occupied housing within the City of Harrisonburg is  
70 possibly due in large part to the number of attached housing units constructed since 2000. The increase  
71 in value of owner-occupied housing within Rockingham County is probably due to the trend to develop  
72 higher priced single-family detached housing in Rockingham County, where more easily developable tracts  
73 of land are available.

74 According to the 2016 ACS, the median monthly housing cost for mortgaged owners as \$1,234,  
75 nonmortgaged owners \$385, and renters \$834. Figure 7-4 shows that estimated 30 percent of owners  
76 with mortgages, 5 percent of owners without mortgages, and 55 percent of renters in Harrisonburg have  
77 a housing cost burden, which means that they spent 30 percent or more of household income on housing.

78

79

80

81

82

Source: U.S. Census, American Community Survey, 2012-2016 5-Year Estimates

83 Table 7-6 presents key housing data for selected cities and counties in 2015 for both owner-occupied and  
84 renter-occupied housing units as presented in The United Ways of Virginia’s ALICE (Asset Limited, Income  
85 Constrained, Employed) Study of Financial Hardship report. For owner-occupied units, the table presents  
86 the percent of owner units that are occupied by households with income below the ALICE Threshold<sup>2</sup> and  
87 the percent of all owner-occupied units that are housing burdened, meaning that housing costs are more  
88 than 30 percent of housing income. For renter-occupied units, the table presents the percent of renter  
89 units occupied by households with income below the ALICE Threshold and the percent of all renter-  
90 occupied units that are housing burdened. In addition, the table includes the Affordable Housing Gap, the  
91 number of additional units needed that are affordable to households with income below the ALICE  
92 Threshold so that all of these households would pay less than one-third of their income in housing.

93

---

<sup>2</sup> The ALICE Threshold is a measure that estimates the minimal cost of the five basic necessities – housing, child care, food, transportation, and health care. More information is available in Chapter 4, Planning Context and within the United Way ALICE Report – Virginia, 2017

97 *Availability of Affordable and Workforce Housing*

98 Housing is generally defined as affordable for a household when the household is paying no more than 30  
99 percent of their income for gross housing costs, including rent and utilities; the remaining amount of  
100 income is for other nondiscretionary spending. When 30 percent or more of a household’s income is spent  
101 on housing costs, the household is referred to as being “housing-cost burdened.” When the term  
102 “affordable housing” is used, however, it usually refers to housing that is affordable to households falling  
103 in the low to moderate income range, with incomes at or below 80 percent of the locality’s median  
104 household income. The term “affordable housing” is also sometimes used to loosely describe the  
105 availability of housing that is affordable for a range of incomes, low and high, and not necessarily  
106 associated with the local median household income. The US Census reports that Harrisonburg’s median  
107 household income is \$38,750. “Workforce housing” has varying definitions in terms of the area median  
108 income (AMI) restrictions, but in its simplest form it “refers to housing that is affordable to working  
109 households that do not qualify for publicly subsidized housing, yet cannot afford appropriate market-rate  
110 housing in their community.”<sup>3</sup>

111

112 Access to and the availability of affordable and workforce housing directly impacts the City’s economic  
113 vitality while the market area economic stability has a direct correlation to the area’s demographic  
114 growth. Lack of affordable and workforce housing deters economic investment due to the difficulties in  
115 attracting employees when their housing costs are greater than 30 percent of their income.

116 The 2015 HRHA Market Analysis identified that although area household incomes have increased, it has  
117 been at a pace below the rate of inflation. There is also a large percentage of low- and moderate-income  
118 households in the City. With the existing waiting lists for all of HRHA’s affordable housing continuing, the  
119 need for affordable rental housing persists.

120

121 While there is a desire to increase the availability of high-end housing within the City, there also exists a  
122 need for affordable owner-occupied housing units for people in the low to moderate income range and  
123 first-time homebuyer opportunities. Harrisonburg is fortunate to have an active and successful  
124 redevelopment and housing authority in the Harrisonburg Redevelopment and Housing Authority (HRHA)  
125 organization, which has been addressing the affordable housing needs of City residents since 1955. The  
126 principal housing goals of HRHA during the coming years is to increase homeownership opportunities for  
127 low- and moderate-income City residents, increased availability of low rent senior housing, and increased  
128 availability of housing for persons with disabilities.

129 HRHA plans to partner with the City to initiate a new local homeownership loan program as part of the  
130 Authority’s Five Year and Annual Plan and their initiatives to take proactive steps to affirmatively further  
131 fair housing.

---

<sup>3</sup> Urban Land Institute. (2007). *Developing housing for the workforce: A toolkit*.

132 *Rental Housing Costs*

133 Rental rates increased substantially between 2000 and 2015. The US Census Bureau collects data on gross  
 134 rent, which is the monthly rental rate plus the average monthly cost of utilities. According to the ACS, the  
 135 median gross rent increased from \$480 per month in 2000, to \$778 per month in 2010, and to \$834 in  
 136 2016. These same data sources also show a steady increase in the percentage of households that paid  
 137 more than 35 percent of their monthly household income for rent from approximately 19 percent of  
 138 households in 1990 to almost 34 percent in 2000 and just over 45 percent in 2016. Keep in mind however,  
 139 that these figures do include the large number of off-campus student households in the City, where  
 140 parents or loans are paying many of the rents. Although this study estimates the number of off-campus  
 141 student vs. non-student renter households, there is no information provided on the rents of only non-  
 142 student households. Additionally, the City’s low vacancy rates causes an increase in rental costs due to a  
 143 reduction in supply and also reduces the availability of affordable housing.

144 **Table 7-6. Rent as a Percentage of Household Income in Harrisonburg 2000-2016**

Percentage of Income	2000	2010	2016
Less than 15%	19.1%	15.1%	11.4%
15-24.9%	27.5%	20.7%	24.0%

149

150 *Subsidized Rental Housing*

151 The Harrisonburg Redevelopment and Housing Authority (HRHA) currently owns and manages a total of  
 152 279 residential units, including J.R. “Polly” Lineweaver Apartments and the Lineweaver Annex located  
 153 downtown; Franklin Heights, LLC, which includes apartments, townhomes, duplexes, and single-family  
 154 detached homes scattered in the community; and Commerce Village a 30-unit permanent supportive

155 housing program with 15 of the units designated for chronically homeless veterans. Commerce Village  
 156 opened in 2016 and is the City’s first housing complex for the homeless, serving veterans and other  
 157 chronically homeless individuals in Harrisonburg.

158 HRHA administers a Housing Choice Voucher (HCV) program which provides rental assistance to  
 159 individuals who are identified as extremely low income or at 30 percent or less of the area’s median  
 160 income. HRHA contracts with private landlords who lease to program participants with the Authority  
 161 paying the difference between what the tenant is required to pay and the actual rent. As of April 2018,  
 162 HRHA’s waiting list for its HCV program total 581 families with 234 landlords participating in the program.  
 163 Additionally, 790 of 858 vouchers were being utilized with 613 of the voucher participants finding housing  
 164 within the City, 165 in the County and 12 in other localities.

165 **Table 7-8. All Programs-Application List Participant Reported Income**

Program	Household Income		
	Greater than \$24,000	Under \$10,000	Zero Income
Housing Choice Voucher	47	116	216
Franklin Heights	31	70	88
Commerce Village	7	90	124
Lineweaver	6	34	39
JR Polly Lineweaver	8	32	45
Family Unification Program	0	2	2
<b>Total</b>	<b>99</b>	<b>344</b>	<b>514</b>

166 Source: Harrisonburg Redevelopment and Housing Authority, April 2018

167 Represents the demand of those applicants applying for services and does not represent the supply or availability.

168  
 169 HRHA reports that as of April 2018, 10 percent of all program applicants have income greater than  
 170 \$24,000, 36 percent have income less than \$10,000, and 54 percent have zero income.

171 HRHA reports that they do not have data regarding the availability of different bedroom sizes in the  
 172 community, but they do track the amount of time required for program participants to secure housing.

173 As of April 2018, the average lease up rate<sup>4</sup> is 2.28 months with 78 percent of participants able to lease  
174 up within 30 to 90 days.

175 **Table 7-9. HRHA Waiting List by Bedroom Size for City of Harrisonburg and Rockingham County, 2018**

<b>Bedroom Size</b>	<b>Households</b>	<b>Percent of Total Households</b>
<b>One-bedroom</b>	136	23.40 %
<b>Two-bedroom</b>	225	38.74 %
<b>Three-bedroom</b>	172	29.60 %
<b>Four-bedroom</b>	41	7.06 %
<b>Five-bedroom</b>	7	1.20 %
<b>Total</b>	<b>581</b>	

176 Source: Harrisonburg Redevelopment and Housing Authority, April 2018.

177 Approximately, 93 percent of all households on the HRHA waiting list have incomes under \$24,000. Some  
178 have no incomes and over half have incomes under \$10,000.

179 Other subsidized housing units within the City include: The Colonnade at Rocktown, Harris Gardens,  
180 Chestnut Ridge, and Mosby Heights. According to HRHA staff, total subsidized and low rent units available  
181 in the City is about 800 units and the availability of subsidized and low rent housing is insufficient to meet  
182 the local need as evident by the extremely long waiting lists and the evidence of high poverty that exists  
183 within the City.

## 184 **Neighborhoods and Housing Goals, Objectives, and Strategies**

185 Goal 5. To strengthen existing neighborhoods and promote the development of new neighborhoods that  
186 are quiet, safe, beautiful, walkable, enhance social interaction, and offer a balanced range of  
187 housing choices. See Chapter 6, Land Use and Development Quality’s Goal 4 and Chapter 15,  
188 Revitalization’s Goal 18 for related objectives and strategies.

189 Objective 5.1 To work with the community to identify neighborhood strengths, weaknesses and  
190 needs and to develop plans of action for neighborhood improvement.

191 Strategy 5.1.1 To identify neighborhoods in need of community-based  
192 neighborhood/small area plans, prepare plans in collaboration with  
193 property owners, residents, and business owners, and to implement  
194 recommendations. Repeated in Chapter 15, Revitalization as Strategy  
195 18.4.1

---

<sup>4</sup> Lease up rate refers to the time it takes for program participants to sign a lease.

- 196 Strategy 5.1.2 To incorporate other City plans and partner agency plans relating to  
197 transportation, parks and recreation, fair housing, and plans to end  
198 homelessness into the planning process for neighborhoods.
- 199 Strategy 5.1.3 To assist neighborhoods in setting up appropriate neighborhood  
200 representative organizations to assist the City and other partners in  
201 implementing neighborhood plans. See Chapter 15, Revitalization’s  
202 Objective 18.4 for related strategies.
- 203 Strategy 5.1.4 To enforce residential occupancy as limited by the Zoning Ordinance.
- 204 Objective 5.2 To develop approaches to increase the percentage of single-family detached and  
205 duplex housing units.
- 206 Strategy 5.2.1 To review and amend the Zoning Ordinance to increase opportunities for  
207 single-family detached and duplex residential development that are  
208 affordable to households in a range of incomes.
- 209 Strategy 5.2.2 To review and amend the Zoning Ordinance to permit small lot and  
210 innovative forms of single-family detached and duplex residential  
211 development as appropriate. Repeated in Chapter 6, Land Use and  
212 Development Quality as Strategy 4.3.3.
- 213 Strategy 5.2.3 To collaborate with property owners to proactively rezone properties to  
214 zoning districts that would allow for and encourage the types of uses as  
215 indicated by the Land Use Guide. Repeated in in Chapter 7,  
216 Neighborhoods and Housing as Strategy 4.2.4.
- 217 Objective 5.3 To continue working with property owners and developers to mitigate any  
218 negative impacts from rezonings and public investment decisions on  
219 neighborhoods and the City.
- 220 Strategy 5.3.1 To require property owners and developers applying for rezonings and  
221 special use permits to prepare and submit impact analyses that address  
222 issues such as: projected increase in population and demand for school  
223 facilities and other public facilities; impacts on vehicular, pedestrian, and  
224 bicycle traffic and circulation; water and sewer service needs;  
225 stormwater runoff impacts; visual impacts; impacts to historic and  
226 environmental resources, etc. The analyses should propose measures to  
227 mitigate impacts.
- 228 Strategy 5.3.2 To impose road impact fees to generate revenue to fund or recover the  
229 costs of road improvements benefiting new residential and non-  
230 residential development, while also considering how fees might increase

231 housing costs and effect affordable housing options. See Chapter 10,  
232 Environmental Stewardship and Sustainability for related Strategy 11.4.7.

233 Goal 6. To meet the current and future needs of residents for affordable housing.

234 Objective 6.1 To promote affordable housing options, including affordable rental properties  
235 and affordable homes for ownership.

236 Strategy 6.1.1 To implement Fair Housing Goals and Priorities as recommended and  
237 prioritized in the Assessment of Fair Housing, which includes expanding  
238 housing choice and access to opportunity; increasing home ownership  
239 among low-income households and members of protected classes;  
240 improving the utility of public transit for low-income and disabled  
241 persons; strengthening anti-discrimination, investigation, enforcement,  
242 and operations; and increasing the level of housing knowledge and  
243 understanding among housing developers, real estate professionals,  
244 elected officials, and the general public.

245 Strategy 6.1.2 To work with the Harrisonburg Redevelopment and Housing Authority  
246 (HRHA) and other agencies and organizations to study and define housing  
247 affordability at the full range of income levels in the City and the region.

248 Strategy 6.1.3 To partner with HRHA and other community housing providers (serving  
249 the elderly, disabled, homeless, low-moderate income families, victims  
250 of violence, and others) to address community housing needs throughout  
251 the region.

252 Strategy 6.1.4 To increase the knowledge of City staff, elected officials, and community  
253 members on affordable housing policies by partnering with community  
254 organizations and agencies to host workshops and create other  
255 educational opportunities.

256 Strategy 6.1.5 To encourage the development and construction of a variety of housing  
257 types provided at a range of densities, types (single-family detached,  
258 duplex, townhome, and multi-family), and costs.

259 Objective 6.2 To promote home ownership to increase the proportion of owner-occupied units  
260 in the City.

261 Strategy 6.2.1 To support expansion of the Family Self-Sufficiency and Lease to  
262 Homeownership programs of HRHA and other homeownership  
263 programs.

264 Strategy 6.2.2 To work with private developers, non-profit community housing  
265 providers, and rental housing providers to offer home-ownership  
266 opportunities for first-time low-moderate income homeowners (e.g.  
267 through the U.S. Department of Housing and Urban Development's  
268 HOME Investment Partnerships Program, Virginia Housing Development  
269 Authority's First Time Homebuyers, and other available housing  
270 programs).

271 Objective 6.3 To support programs that prevent and address homelessness in the City.

272 Strategy 6.3.1 To support the implementation of the City of Harrisonburg and  
273 Rockingham County Ten Year Plan to End Homelessness, as part of the  
274 goal to end chronic homelessness and help to move families and  
275 individuals into permanent housing.

276 Strategy 6.3.2 To support the Western Virginia Continuum of Care's implementation of  
277 strategies to prevent homelessness in the region.
